                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Sequence 3, Application US/08187785
Patent No. 5756476
GENERAL INFORMATION:
APPLICANT: Epstein, Stephen
APPLICANT: Spelr, Edith
TITLE OF INVENTION: Inhibition of No. 5756476-Transformed Cell
TITLE OF INVENTION: Proliferation Using Anti-Sense Oligonucleotides
NUMBER OF SEQUENCES:
ADDRESSEE: Knobbe, Martens, Olson, and Bear
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 ;

Sequence 11, Application US/09318448

Patent No. 6210950

GENERAL INFORMATION:
APPLICANT: Stenroos, Edward S.
APPLICANT: Stenroos, Edward S.
TITLE OF INVENTION: METHODS FOR DIAGNOSING, PREVENTING, AND TREATING
TITLE OF INVENTION: DEVELOPMENTAL DISORDERS
FILE REFERENCE: 601-1-67
CURRENT APPLICATION NUMBER: US/09/318,448
CURRENT FILING DATE: 1999-05-25
NUMBER OF SEQ ID NOS: 46
SOFTWARE: PatentIn Ver. 2.0
                                                                                                                                                                                                                                                                                                                                                                                                                                                      Length 18596;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              STREET: 30500 No. 6025183thwestern Highway, Suite 410 CITY: Parmington Hills STATE: Mindigan COUNTRY: U.S.
